VENKATESH AMMIREDDY

AI-Native Product UX Architect | UX Design Leader | Experience Design Engineering

Hyderabad, Telangana, India +91 9030436110 venkateshcreations@gmail.com linkedin.com/in/venkateshammireddy
venkateshcreations.github.io/portfolio

PROFESSIONAL SUMMARY

AI-driven Product UX Architect and UX Design Leader with **13+ years of professional experience** shaping digital products, enterprise platforms and scalable user experiences. Specializes in translating business objectives, product requirements and complex workflows into intuitive, intelligent and engineering-ready experiences.

Combines strategic UX architecture, human-centred design, enterprise product design and emerging AI technologies. Experienced in AI-assisted design engineering, LLM-powered workflows, agentic UX concepts, rapid frontend prototyping and dynamic design system development. Brings a systems-thinking approach to product innovation—connecting product context, UX strategy, AI agents, interface execution, evaluation and continuous improvement.

CORE COMPETENCIES

Product UX Architecture
UX strategy, information architecture, interaction design, journey mapping and product workflows.

AI-Native UX
Human–AI interaction, LLM-powered experiences, agentic UX concepts and intelligent workflows.

Experience Design Engineering
AI-assisted prototyping, frontend-focused development and design-to-code workflows.

Design Systems
Component architecture, reusable UI systems, design tokens and responsive frameworks.

Enterprise Product Design
SaaS platforms, complex dashboards, data visualization, cybersecurity and operational intelligence.

Design Leadership
UX direction, product thinking, stakeholder collaboration, design quality and strategic advisory.

PROFESSIONAL EXPERIENCE

ProVise Consultancy · OPTIMAS.AI (Dubai-based startup)
Sep 2022 – Nov 2025

Senior Product UX Architect / Creative Director

- Led product UX architecture and experience design initiatives for an AI-oriented product environment.
- Translated complex business requirements into structured product experiences, workflows and interactive interfaces.
- Applied strategic UX thinking across product structure, usability, interaction patterns and interface architecture.
- Collaborated with product and engineering stakeholders to align experience direction with implementation requirements.

RLabs Enterprises · Client: Mindtree
Apr 2021 – Sep 2022

UX Lead – Product Design Lead

- Led UX and product design activities for enterprise-oriented digital solutions.
- Structured user experiences through workflow analysis, information architecture and interaction design.
- Developed wireframes, prototypes and interface solutions to communicate product requirements.
- Collaborated with cross-functional stakeholders to support design alignment and engineering handoff.

EPSoft Inc.
Nov 2019 – Dec 2020

Lead Consultant – UX Architect

- Contributed UX architecture and design consulting for complex digital product experiences.
- Translated functional requirements into structured user journeys, interface concepts and scalable UX solutions.
- Supported product design decisions through wireframing, prototyping and interaction design.

PROFESSIONAL SPECIALIZATIONS

Enterprise SaaS & multi-domain ecosystems · Cybersecurity automation, RPA & process intelligence · AI-powered dashboards & operational interfaces · Data visualization & information architecture · Scalable design systems · AI-assisted product experience development

LEARNING & DEVELOPMENT

- Enterprise Design Thinking Practitioner — IBM
- Risk Management for Cyber Security & IT Managers
- Compliance Risk Management
- IT Audit Fundamentals, Controls, Standards & Policies
- Ontology & Enterprise Context Management
- Ongoing research in LLMs, Agentic AI & AI-assisted UX Engineering

EDUCATION

Bachelor of Commerce (B.Com.)
Osmania University, AV College of Arts, Science & Commerce, Hyderabad · 2009

AI-NATIVE EXPERIENCE DESIGN ENGINEERING

Context → Rules → AI Agents with Custom Skills → Live Interface → Test & Iterate → Engineering Delivery

Explores AI-assisted workflows that accelerate product ideation, UX exploration, interactive prototyping, interface development and design system implementation.

- AI-assisted UX requirement analysis, product ideation and experience exploration.
- Agentic workflows and specialized AI skill orchestration for UX activities.
- Local and cloud-based LLM experimentation and open-source model utilization.
- AI-assisted frontend prototyping, design system creation and interface validation.
- Human-centred evaluation of AI-powered product interactions.

SELECTED INDEPENDENT INNOVATION & PORTFOLIO PROJECTS

GARUDA INTELLIGENCE — UI/UX MULTI-AGENT INTELLIGENCE SYSTEM

Creator / System Architect

Multi-agent UX intelligence architecture exploring orchestration, cognition, execution, simulation, evaluation and memory. Includes specialized agent concepts for product strategy, UX psychology, information architecture, interface design and frontend architecture.

DISC-AI — AI TOOL DISCOVERY PLATFORM

Independent Product Initiative

AI tool discovery experience concept focused on organizing AI platforms and tools into a structured discovery interface.

ENTERPRISE PRODUCT EXPERIENCE SHOWCASE

Independent UX & Design Engineering Initiatives

Portfolio explorations across FlowTrack AI (operational dashboard), Deepfake Defense and AXIOM (cybersecurity intelligence), Enterprise Digital Banking (financial product interfaces), Digital Transformation Intelligence Hub (enterprise analytics), GEC Supply Chain Analytics, Radiostream / SteamVerde (media and streaming), EduCore (education management) and VOXAR (AI video intelligence).

Portfolio initiatives and concepts are presented as independent work; they are not represented as separate employment engagements or verified client deployments.

AI, DESIGN & ENGINEERING ECOSYSTEM

Design & Creative

Figma, Adobe Creative Suite, design sketching and prototyping tools.

Local AI & Infrastructure

Ollama, LM Studio, local LLM experimentation, open-source models and privacy-conscious AI workflows.

AI Models & Platforms

OpenAI, Anthropic Claude, Google Gemini, Qwen, DeepSeek, MiniMax and emerging LLM ecosystems.

Integration & Engineering

GitHub, MCP, frontend prototyping, reusable components and design-to-development workflows.

AI Development & Coding

VS Code, Cursor, Windsurf, OpenCode, Claude Code, Codex, Google Antigravity and AI-assisted development environments.

Experience Delivery

Wireframing, interactive prototypes, interface systems, design validation and engineering handoff.

INDEPENDENT REMOTE WORK INFRASTRUCTURE

Dedicated personal workstation supporting independent product design, AI-assisted development and remote collaboration.

- High-performance computing environment and multi-display workspace.
- Local AI model experimentation and independent prototyping workflows.
- Internet connectivity and backup infrastructure for remote collaboration.
- Remote-first communication and project execution across time zones.

PROFESSIONAL ENGAGEMENT

Open to: Full-time opportunities, remote-first UX leadership roles, Product UX Architecture, independent consulting, contract engagements and strategic UX advisory.
